

Space

Worksheet 29

Day/Night

1. Complete:

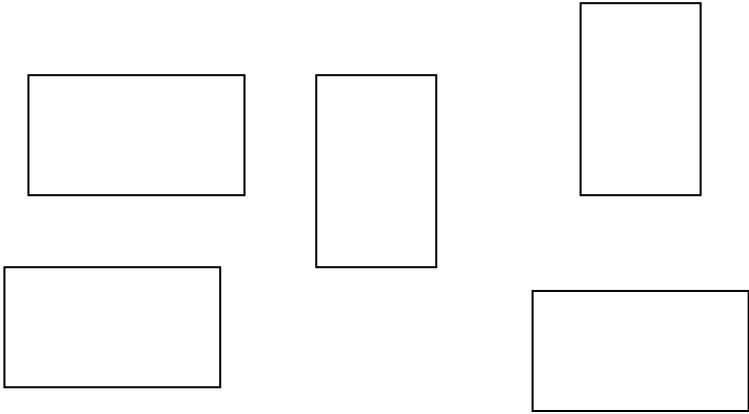

Day - year - orbits - night - spins

- The Earth **orbits** the sun.
- The Earth **spins** causing day and night.
- It takes a whole **year** (365 days) for the Earth to orbit the sun.
- When the sun's light shines on Spain, we have **day**
- When our part of Earth doesn't face the sun, we have **night**.

Draw and write

During the day I can...	At night I can...
-------------------------	-------------------

2. Write different names of countries and draw different flags. Use the globe to help you.

Day-Time (light)	Night-Time (dark)
<p data-bbox="427 507 855 549">It is day-time in Spain</p> 	<p data-bbox="1323 507 1841 549">It is night-time in Australia</p>
