

Revision

1. Complete

An animal with a backbone is a **Vertebrate**.

An animal with no backbone is an **Invertebrate**.

2. What's wrong?

Re-write these statements so that they are true.

a. Reptiles lay eggs in water.

**Reptiles lay eggs on land.**

b. Young amphibians breathe through lungs.

**Young amphibians breathe through gills.**

c. Fish have a covering of hair or fur.

**Fish have a covering of scales.**

d. Mammals lay eggs on land.

**Mammals are viviparous**

e. Birds are viviparous.

Birds are oviparous.

3. Work in groups.

- Choose a type of vertebrates (fish, amphibians, reptiles, birds or mammals) or invertebrates (worms, insects, molluscs or spiders).
- Create a poster using a word processor.
- Give some information and amazing facts.
- Insert pictures of the type of vertebrate you have chosen.

You can find information in the following websites:

<http://www.bbc.co.uk/schools/ks2bitesize/science/>

<http://www.enchantedlearning.com/Home.html>

[http://en.wikipedia.org/wiki/Main\\_Page](http://en.wikipedia.org/wiki/Main_Page)

<http://www.google.com/>

How to use the word processor

- Open up a word processor.
- Go to the **File Menu** and select a **New Document**.
- Type the information.
- Decide on a **font**, **size** and **style** for your text.
- Insert a **header** for the title.
- Insert a **footer** and write your name.
- Check your spelling.
- Add some graphics to your work.
