

Make a Paper Snowflake or a Snowflake Card

Make simple snowflakes from paper. You can tape these snowflakes to a window for a nice winter decoration or paste them onto a piece of folded construction paper for a great winter card.

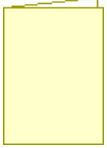

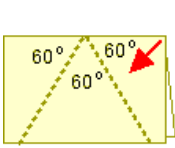

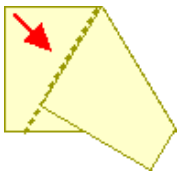

Supplies needed:

- White paper
- Scissors
- Optional: A protractor
- Optional: Glitter or glitter glue
- For a card: A piece of coloured construction paper and glue

scissors

Real snowflakes all have six sides, so the first part of this project involves folding a piece of paper into sixths.

	Fold a piece of paper in half.	
	Fold over one side, then the other, to make two 60 degree folds. You can do this by eye, or you can use a protractor. This is a good exercise in geometry and measuring angles.	
	Cut off the edges of the paper in an arc - this makes a circle (if you were to unfold the paper).	
	Cut a lot of the paper away.	
	Unfold your snowflake carefully. Optional: Decorate your snowflake with glitter or glitter glue.	
	Glue your snowflake onto a folded piece of construction paper for a great winter card.
