

Magic Square KEY

13	8	12	1
2	11	7	14
3	10	6	15
16	5	9	4

This is only one of the possibilities. If you reverse the rows horizontally or vertically the answer is the same.

Suggestions:

- ✓ Remind the children to use only English.
- ✓ This game is to use numbers and the vocabulary for addition. It's easy for the children to speak all the time in English so they get used to communicate in English.

This game is adapted from the book:
