

Our numbers

Page 1: our numbers.

1. Compare with the Roman system. Using zeros allow us to give a value for every position. It is important to be able to express the empty position, the absence of a quantity.
2. It is a clear reference based in natural facts about water. Water is also the reference for the boiling point.
3. Here we are talking about opinions, but perhaps it is easier with the Celsius scale to remember and imagine temperatures. 0 is where the negative numbers and positive numbers start. Perhaps we find it easier because we are used to Celsius scale.
4. Because it divides the earth in two halves and makes the references for other latitudes symmetrical north/south.
5. Compare and say which one is clearer and gives us more possibilities to carry out calculations and to play with numbers (try some simple operations).
6. Basically, there are 7 vertebrae and the hyoid bone in the neck
7. The opposite sides of a dice always add 7.

Page 2: place value 1.

Th/Th	H/Th	T/Th	Th	H	T	U
		3	4	1	0	9
7	0	0	0	2	2	5
					8	8
					1	4
			5	6	5	0
1	1	0	0	0	0	1
	4	0	0	0	6	3
						7
				9	4	5

Page 3: place value.

Thousands	Hundreds	Tens	Units Ones	.	Tenths	Hundredths
		2	4			
3	0	5	1			
		2	9	.	4	3
50	6	9	1	.	1	8
	1	9	0	.	5	
			6	.	0	2
7	3	2	8	.	6	9
	8	3	0			
			4	.	5	
		6	4	.	3
