PLANTS – flowers, seeds and fruits

Activity 2

Let's look at the parts of a flower!

A) Look at a flower, draw and colour it and, finally, label the flower with the underlined words below. Use plant books with images and/or web pages to help you!

SEPALS, PETALS, one or more PISTILS and STAMENS.

B) Split the flower open through the middle, use the binocular magnifying lens to look at the different parts, finally draw and colour the different parts. Use plant books with images and/or web pages to help you!

FEMALE PARTS	MALE PARTS

Name:

Date:

C) Label the parts of the flower in section “B” with the underlined words below. Use plant books with images or/and web pages to help you!

The **PISTIL** (female part) is made up of: STIGMA, STYLE, OVARY and OVULES.

The **STAMENS** (male parts) are made up of: FILAMENT, ANTHER, POLLEN SACS and POLLEN.
