## An Educational Approach To The Archaeology Of The Spanish Civil War: The Bridgehead Of Balaguer

Antoni Bardavio Novi (*Generalitat de Catalunya*) & Paloma González Marcén (*Universitat Autònoma de Barcelona*)

Since 2008, the *Camp d'Aprenentatge de la Noguera*, an education service of the Generalitat of Catalonia, has been involved in the restoration project of one of the most emblematic places of the Civil War in western Catalonia: the defensive position of the so called *Merengue* in Camarasa.

To carry out this task we have relied on the collaboration of the *Associació d'Estudiosos del Front del Segre*, which promotes the location and retrieval of spaces of memory in the area of the bridgehead of Balaguer and the diffusion of sites and facts about the war. The contribution of the *Camp d'Aprenentatge de la Noguera* has involved the design of a series of educational activities for secondary school students that allow them to approach to the location and key moments of the local history of the Civil War both for working in the classroom and at the archaeological sites.
