

Name:	Date:
Habitats	Habitats & Ecosystems

1. What is the name of our planet? The name of our planet is

.....

2. Tick  the correct sentence:

- There is more water than land on the Earth.
- There is more land than water on the Earth.

3. Order the different habitats as you see them on the power point presentation.

Grasslands		Taiga	
Desert		Tropical ocean	
Streams		Wetlands	
Temperate ocean		Rainforest	
Lakes		Shorelines	
Tundra		Temperate forest	
Ponds		Rivers	

Name:	Date:
What is a habitat?	Habitats & Ecosystems

4. Fill in the gaps to complete the definition of a habitat. Use the words given.

A _____ is the _____ home of a group of _____ and _____.

plants, habitat, animals, natural

5. Classify the different habitats.

Habitats		
Land	Freshwater	Marine
		

Deserts - Ponds & Lakes - Rainforests - Temperate Oceans -
Temperate forest- Rivers & Streams - Tundra - Wetlands - Grasslands
- Shorelines - Taiga - Tropical Oceans

Name:	Date:
Research on a habitat	Habitats & Ecosystems

Research on a habitat

You have one week to work on your own and make some research on a habitat. You have to fill in this worksheet with the information you find. You can use the internet or go to the library and look up some books.

Name of habitat:

Type of habitat:

Weather of habitat:

Animals that live in this habitat:

Plants that live in this habitat:

Name:	Date:
Compare two habitats (A)	Habitats & Ecosystems

Rainforest

Tropical Ocean

The rainforest and the tropical ocean are different habitats. The first one is a land habitat and the second one is a marine habitat.

In both habitats, different animals and plants live.

Fish and coral live in the tropical ocean. Monkeys and parrots live in the rainforest.

The climate of the rainforest is hot and wet. In the tropical ocean the water temperature is warm and usually constant all year around.

Name:	Date:
Compare two habitats (B)	Habitats & Ecosystems

Now is your turn to compare two habitats.

1. Compare the information you have about the two habitats with your partner.

2. Have a look at the text and fill in the gaps with the information you have found.

The _____ and the _____ are different habitats.
The first one is a _____ habitat and the second one is a _____ habitat.
In both habitats, different animals and plants live.
_____ live in the _____.
_____ live in the _____.
The climate of the _____ is _____. In the _____ the temperature is _____.

3. Ask your teacher to correct the text.

4. Take a piece of cardboard, glue some pictures of the habitats you have chosen and write the text. Then explain your work to the rest of your classmates.

Name:	Date:
What is a community?	Habitats & Ecosystems

1. Order the words to complete the definition of a community.

A community is the word given

.....

.....

the - particular - live - animals - to - plants - that - a -
habitat - and - in - together

2. Give examples of living and non-living elements.

Living elements	
Non-living Elements	

3. Complete the definition with the words missing.

A habitat must provide the community with three things:
..... , and

Name:	Date:
Adaptations	Habitats & Ecosystems

What habitats have these animals adapted to?

	The giraffe has adapted to the
	The has adapted to the
	The
	The

Name:	Date:
Adaptations pair work	Habitats & Ecosystems

Talk about the adaptations of these animals.

Partner A

Camels Kangaroo rats The Polar Bear Penguins The Southern elephant seal Frogs	is adapted to are adapted to	stay under the water for nearly 2 hours. surviving on very little water. live in water and on land. swim faster than many fish. temperatures of up to 50°C. freezing temperatures.

Name:	Date:
All about me!	Habitats & Ecosystems

All about me!

Write about you!

What's your name?	My name is
How old are you?	I'm years old.
Where are you from?	I'm from
Where do you live?	I live in a
What food do you usually eat?	I usually eat
What do you study at school?	I study at school

Name:	Date:
Jigsaw puzzle text	Habitats & Ecosystems

Read the text.

Producers

Producers are the beginning of a food chain. Producers are **plants** and **vegetables**. Producers are able to use the **energy** of the sun to make **food**. They use the process of **photosynthesis**.

Name:	Date:
Jigsaw puzzle text	Habitats & Ecosystems

Read the text.

Consumers

Consumers are the next link in a food chain. Consumers eat something else. There are three different types of consumers: **herbivores**, **carnivores** and **omnivores**.

Herbivores eat **plants**. They are also called primary consumers.

Carnivores eat **other animals**. They are also called secondary consumers.

Omnivores eat **plants and meat**. They are also called tertiary consumers.

Name:	Date:
Jigsaw puzzle text	Habitats & Ecosystems

Read the text.

Decomposers

Decomposers are the last link in a food chain. When **plants and animals die**, they become **food for decomposers** like **bacteria, fungi** and **earthworms**. Decomposers recycle dead plants and animals into chemical nutrients like carbon and nitrogen that are released back into the soil, air and water.

Jigsaw Puzzle Questions	Habitats & Ecosystems

- Read the text. You can use a dictionary to look up the words you don't understand.

The Pictures will help you understand the text!

- Get in groups of three. Check that you all have different texts.
- Put the texts in order. Write your answers here:

1. _____
2. _____
3. _____

- Which words helped you decide this order?

- Answer these questions:

1. Why plants are called producers? Because they
2. Why are plants essential to all animal life? Because they
3. What is a consumer? It is
4. What do consumers eat? They eat.....

Name:	Date:
Jigsaw Puzzle Questions	Habitats & Ecosystems

5. What are the three types of consumers?

Type 1

Type 2

Type 3

6. Which animal has more chances to survive: a carnivore or an omnivore?

..... Why? Because

.....

7. Order the names of these organisms to create a food chain.

Aphids - sparrow hawk - leaves - willow tit

Research on a Food Chain	Habitats & Ecosystems

Research on a Food Chain

You have one week to work on your own and make some research on a food chain. You have to fill in this worksheet with the information you find. You can use the internet or go to the library and look up some books.

Type of food chain: Land / Freshwater / Marine

Number of living things:

Name of the producer:

Name of the consumers:

Herbivores:

Carnivores:

Omnivores:

Name of the decomposer:

Name:	Date:
Our Food Chain	Habitats & Ecosystems

Create your own food chain. Write the names of the different elements inside the boxes. Then explain who are the producer, the consumers and the decomposer.

In this food chain the producer is

.....

.....

.....

Name:	Date:
Pollution	Habitats & Ecosystems

1. Order the words to complete the definition of pollution.

Pollution is

.....

.....

.....

Damage - habitats - around - to - the - animals - World - we the - they
- live - in. - may - harm - us - human - world - health - live - and -
plants - cause - damage - to - Pollution - the - the - and - and - in.

2. Why have half of the rainforests on Earth been destroyed?

Because are cut down either for timber, or to clear the
..... for and Some
..... are destroyed by companies looking for
..... and

Trees - land - farming - building - forests - mining - oil - metals

3. What is the result of this destruction?

.....

.....

.....

Name:	Date:
Pollution	Habitats & Ecosystems

4. Write each name under the correct picture.

.....

.....

.....

.....

.....

soil pollution - light pollution - air pollution - water pollution - noise pollution

Name:	Date:
Causes and effects of pollution	Habitats & Ecosystems

1. Complete the chart with the words given:

Causes of pollution				
Air pollution	Water pollution	Soil pollution	Noise pollution	Light pollution

Power station - trains - vehicle exhausts - deforestation - boats - mining - waste from towns and cities - factories - traffic sound - pesticides - airplanes - construction - very loud music - human waste - bright lights

Name:	Date:
Causes and effects of pollution	Habitats & Ecosystems

2. Match up the two halves of each sentence so that they make sense.

Partner A

The death of fish and other life in the ocean	is an effect of are the effects of	air pollution.	
Health problems		water pollution.	
Global warming		soil pollution.	
Confused animals and drivers		sound pollution.	
Extreme weather such as hurricanes and floods		light pollution.	
Confused migrating whales			
The death of animals			
Acid rain			

Partner B
