## TEST YOUR HYPOTHESES

Touch the flowers, touch the sprays, AND DECIDE!

Hypothesis 1:						
Evidence supporting	Evidence refuting					
We (verb in past) and we found that	We (verb in past) but we didn't find that					
Hypothesis 2:						
Evidence supporting	Evidence refuting					
We (verb in past) and we found that	We (verb in past) but we didn't find that					

English through science Joan Alberich Carramiñana

## Write down your conclusions. Use the following substitution table:

We think that perhaps the flower changed its colour because			(hypothesis 1)		or because		(1	(hypothesis 2).	
The evidence	first	hypothesis is (		s (that) (first argumen			and	(second argument).	
supporting the	second					rgument)			
There is no evidence supporting the				first			hypothesis.		
				second					
The evidence	first	hypothesis	that) (first argument)		and (second argume		and argument)		
refuting the	second	riypotriesis			(that)	(360	(second argument).		
There is no evidence refuting the				first			hypothesis.		
				second					
Our conclusion is then that the		a str	a stronger evidence for the			first h		hypothesis.	
		the		first hypothe		sis is more likely to be true.			

## **CONCLUSION**
