Is it easy to recycle in our town?

How many recycle banks are there in our neighborhood?

The zone: **km2**

Perimeter Streets:

Kind of banks:

What is the furthest distance to be walked?

Are they clean?

How often are they emptied?

Do people mix different waste?

Other observations:

Some advices for our Town Hall

We have observed:

So, we suggest:

Find out the population who live in our neighborhood and calculate the number of people for each bank
