STATES OF MATTER - solids

Activity 4

We are going to grow crystals from a saturated solution. You already know what a sugar crystal is like, but after the experiment: What do you imagine a sugar crystal to be like? Bigger, smaller, the same colour, a different colour... Draw it and add measurements.

Draw

Measurements

I think that the crystal will measure ..... x ..... x ..... \_\_\_\_\_

Activity 4

- I think that my sugar crystal will be *tiny/very small/small/big/ very big/enormous/...*

- I think that my sugar crystal will measure..... long and ..... wide.
