

Angles

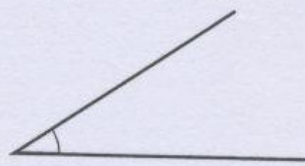

An angle is a measure of space between two straight lines.

There are four different types of angle.

Right angle = 90°

Acute angle = angle less than 90°

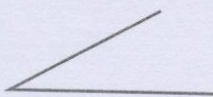

Obtuse angle = angle more than 90°

a) Identify these angles as acute or obtuse:

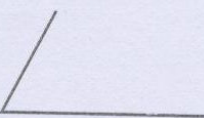

1.

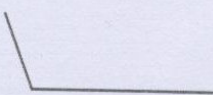

2.

3.

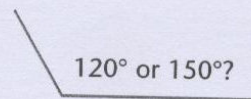

4.

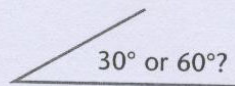

b) Estimate these angles:

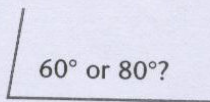

1.

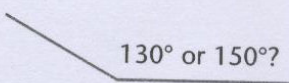

2.

3.

4.

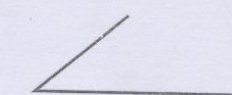

c) Measure these angles:

1.

2.

3.

4.
